

Exercise 15 Answers

Introduction to packages

- 1.
- 2.
- 3.
4. Here is the first way to write the file `PackageAccess.java`:

```
class PackageAccess {
    public static void main(String[] args) {
        pkg1.A a = new pkg2.A();
        a.aMethod();
    }
}
```

Here is the second way using the `import` statement:

```
import pkg1.A;

class PackageAccess {
    public static void main(String[] args) {
        A a = new A();
        a.aMethod();
    }
}
```

Here is the third way using the `import` statement:

```
import pkg1.*;

class PackageAccess {
    public static void main(String[] args) {
        A a = new A();
        a.aMethod();
    }
}
```
